WORK EXPERIENCE

Sigma Solusi

Aug. 2024 – Present

Data Scientist

- Architected the foundational phase of a [Dockerized RAG-based chatbot](#) (ChromaDB, sentence-transformers) for a B2B platform, establishing the baseline for **semantic product search** and robust **intent classification (35+ types)**.
- Engineered a specialized FAQ model for **WhatsApp deployment**, utilizing [knowledge distillation](#) and **LoRA fine-tuning** (Llama-3.1 70B into Gemma-2 9B) to reduce inference latency while maintaining accuracy.
- Built an **MLOps retraining pipeline** via n8n, enabling 10+ iterative rounds with rigorous **A/B validation** across 154 structured test scenarios.
- Developed end to end **demand forecasting pipelines** (PyTorch, SQL) and designed **BI solutions** including warehouse simulations and stock balancing systems to optimize operational efficiency and reduce carrying costs.

Beehive Drones

Aug. 2022 – Jan. 2023

Machine Learning Engineer - Internship

End-to-end aerial imagery pipeline for carbon value estimation; TensorFlow model achieved **93% accuracy improvement** over SVR baseline.

EDUCATION

Universitas Kristen Duta Wacana

2024

Bachelor of Science, Informatics. 3.75 GPA

Thesis: Gender Classification from Fingerprints using Gabor Filters, achieved **7% F1-score improvement**.

github.com/adiatmaja/GenderClassification

SKILLS

Languages & DB:	Python, SQL, Java, PHP, MySQL, ChromaDB
ML/DL:	PyTorch, TensorFlow, Keras, scikit-learn
Tools:	Pandas, NumPy, Git, Streamlit, n8n, Docker
Dev:	AI-Assisted Development, Automated Code Review, TDD
Focus:	Forecasting, LLM Fine-tuning, RAG, Knowledge Distillation, MLOps, Deep Learning

CERTIFICATIONS

TensorFlow Developer Certificate

2023

[Credential ID 86185588](#)

PROJECTS

ASAH (Aplikasi Sortir Sampah) - Waste Classification App

May 2023 – Jun. 2023

github.com/ASAH-Bangkit-2023/ASAH-Project

Achieved **94% accuracy (+6.1%)** using MobileNetV2; optimized for real-time mobile inference on Android.
