WORK EXPERIENCE

Sigma Solusi

Aug. 2024 – Present

AI Engineer

- Built internal AI assistants (WhatsApp and web-based) with custom data pipelines that let non-technical teams query sales, inventory, and procurement data in plain language across multiple darkstores, eliminating manual SQL reporting.
- Built a production demand-forecasting system covering 600+ products that predicts daily sales and revenue and retrains itself automatically each week. Cut chronic under-forecasting by more than half through A/B-tested bias correction with no loss in accuracy, reducing stockouts during peak-demand periods. Built on tiered NHITS and LightGBM models with probabilistic output.
- Engineered a procurement system that automates weekly purchasing decisions for 2,200+ products, maximizing gross margin under tight capital constraints through dynamic product classification and supplier optimization.

Beehive Drones

Aug. 2022 – Jan. 2023

Machine Learning Engineer - Internship

- Developed an automated image-processing pipeline for drone photography to estimate environmental carbon value, improving accuracy by 93% over previous baseline models.

PROJECTS

Praxis - AI Agent Orchestrator that Plans, Implements, Reviews, and Merges Code

github.com/adiatmaja/praxis

- Built a self-hostable engine that runs the full software loop autonomously: a planner model decomposes a spec into tasks, spins up containerized coding agents on isolated git branches, then opens, reviews, and merges PRs with automatic retries.
- Designed a cost-tier architecture splitting planning/review (subscription model) from token-heavy implementation (free local model), exposed via an **MCP server** so AI assistants like Claude Code can dispatch real work to local LLMs.

EDUCATION

Universitas Kristen Duta Wacana

2024

Bachelor of Science, Informatics. 3.75 GPA

Thesis: Gender Classification from Fingerprints using Gabor Filters, achieved **7% F1-score improvement**.

github.com/adiatmaja/GenderClassification

SKILLS

Agentic AI	: AI Agent Development, Model Context Protocol, RAG, LLM Fine-tuning, Generative AI
AI-Assisted Dev	: AI Coding Agents, Automated Code Review, AI-Assisted Development, TDD
ML/DL	: PyTorch, TensorFlow, Keras, scikit-learn, Forecasting, MLOps
Languages & DB	: Python, SQL, Java, PHP, MySQL, ChromaDB
Tools	: Pandas, NumPy, Git, Docker, FastAPI, Streamlit, n8n

CERTIFICATIONS

TensorFlow Developer Certificate

2023

[Credential ID 86185588](https://www.tensorflow.org/certificate/credential/86185588)
